EXAMINER'S AMENDMENT

An examiner's amendment to the record appears below. Should the changes and/or additions be unacceptable to applicant, an amendment may be filed as provided by 37 CFR 1.312. To ensure consideration of such an amendment, it MUST be submitted no later than the payment of the issue fee.

Authorization for this examiner's amendment was given in a telephone interview with Mollie M. Yang on 31 January 2005.

IN THE CLAIMS –

In line two of claim 14, the word --compuond-- has been deleted and "compound" has been inserted therefor.

Claim 15 has been cancelled.

In line one of claim 17, the phrase --or prevention-- has been deleted. In line three of claim 17, --(interstitial cystitis)-- has been deleted.

In line one of claim 18, the phrase --or prevention-- has been deleted.

In line two of claim 19, the phrase --diabetic symptoms associated with-- has been deleted.

In line one of claim 20, the phrase --prevention of-- has been deleted.

Allowable Subject Matter

Claims 1-14 and 16-20 are allowed.

The following is an examiner's statement of reasons for allowance:

A search of the prior art afforded no disclosure which renders obvious or anticipates the compounds according to claims 1-13, thus the pharmaceutical composition of claim 14 and methods according to claims 16-20 are novel and unobvious as well.

The methods according to claims 16-20, as amended herein, are deemed enabled by the disclosure, as treatment of pain by administering a bradykinin receptor antagonist was within the level of ordinary skill in the art at the time the invention was made. Although a few non-pain related conditions are specified in the method according to instant claim 19, the claim is deemed enabled because those conditions recited in addition to pain are sufficiently narrow in scope so as to permit the method's practice without undue experimentation (arguably, however, the conditions recited in claim 19 can be characterized as painful conditions).

In an inventor name search, the co-pending application with U.S. serial number 10/614,390 was considered. This examiner is assigned case 10/614,390. Although the co-pending application presents some overlapping subject matter at least insofar as the compounds claimed therein are concerned, the instant application is being allowed to pass to issue because pursuant to the attached Examiner's Amendment, the provisional Obviousness-Type Double Patenting rejection necessitated by the co-pending application is the only outstanding issue (the Examiner's Amendment was made to correct deficiencies under the first and second paragraphs of 35 U.S.C 112). Thus, the

Art Unit: 1624

examiner is allowing the instant case to pass to issue, as the MPEP directs the examiner to do in chapter 804.

The following are notations of close prior art with respect to the compounds according to the invention:

V. D. ROMANENKO, et al., (English version - translated from): Khimiya Geterotsiklicheskikh Soedinenii, 2, pp 264-266 (1973).

Romanenko et al teaches some compounds similar to those claimed, but these lack the specific heterocyclic substitutions on the phenyl in R¹ of the formula (I) compounds.

JP 05331151 (Fujiwara et al).

Fujiwara et al teaches the following compound, and many close analogs thereof

as neuroprotectants for cerebral ischemia.

Neither Romanenko et al nor Fujiwara et al suggest any compound of the instant invention.

Any comments considered necessary by applicant must be submitted no later than the payment of the issue fee and, to avoid processing delays, should preferably accompany the issue fee. Such submissions should be clearly labeled "Comments on Statement of Reasons for Allowance."
